4. Funtions and duties of contractor

Institute of Forest Ecology and Environment - Vietnam National University of Forestry operates in the following fields of science and technology:

- Field of research: Scientific research and technology development on ecology and environment, biodiversity, sustainable forest resources management and use, GIS application, Remote sensing and information technology application in Forestry, Collecting and preserving specimens for research and education purpose.
- Scientific and technological services: Consultant, consulting on technology transfer, participating in training, scientific information dissemination, national and international cooperation in fields: forest ecology and environment, forest tree varieties, biodiversity, sustainable forest resources management and use forest and agroforestry land planning surveys, forest resource inventory, social forestry, climate change, forestry policies.

VISION AND COMMITMENT

The establishment of the Institute aims to "Contribute to strengthening the training and scientific research capabilities of Vietnam National University of Forestry, meeting the demand for high-level human resources in forestry for the industrialization and modernization of the country".

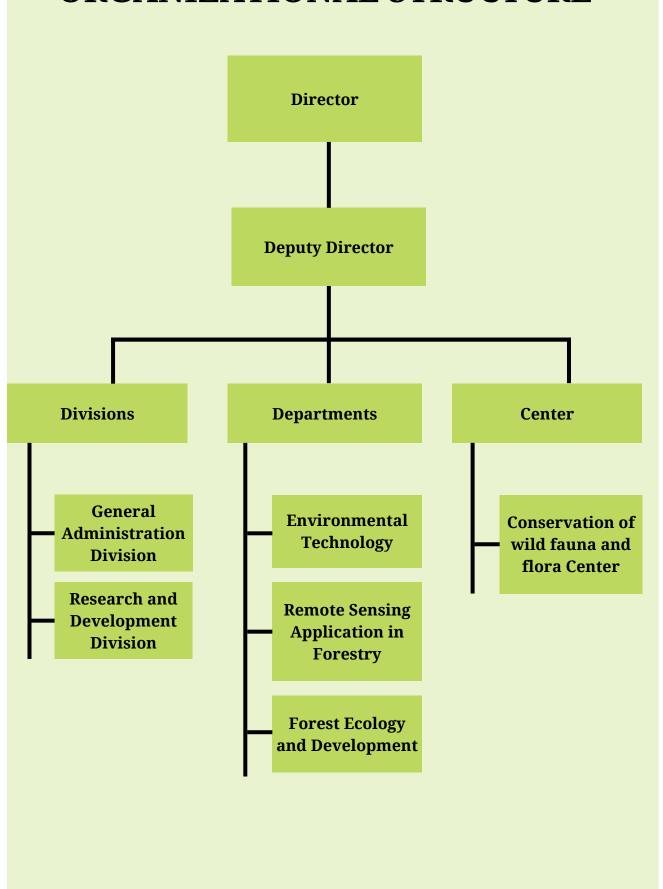

IFEE aims to become the first choice for customers in consulting services on the application of advanced technology in sustainable forest management, towards the mission of globalization- Green Planet.

IFEE always considers customer requests as top priority.
